

Enhanced Learning Strategy proudly presents the return of....

Robotics Workshop - Offer of Service

This offer of service is to support schools and teachers with the alignment of technology to meet their students' goals.

As schools have begun to experiment and integrate robotics in their teaching, we wish to offer a Lego NXT workshop for **beginning users** on **November 18th, 2011**, at Princess Elizabeth Elementary in Magog, QC.

If you have teachers who are interested in taking part in this full-day workshop at PEES on November 18th, please register with Louise Cockle at cocklel@etsb.qc.ca to book your place. This session is designed to be an interactive hands-on session. This session is designed for groups **no larger than 24 teachers**.

This Offer of Service is at no cost to schools and centres, however, **it is expected that the school will cover the travel costs and lunch of their own teachers.**

The session is a full day of building and programming the Lego NXT robotics kits, lead by a certified NXT Trainer.

If you have any questions, please contact me at anytime.

Thank you,

Randy MacLEAN
